

A. Start with 3 cubes.

(part) (total)

Take away 1 cube.

(part) (total)

How many cubes are left?

(part) (total)

$$3 - 1 = \underline{2}$$

$$1 + \underline{2} = 3$$

There are 2 cubes left.

B. Start with 5 cubes.

(part) (total)

Take away 2 cubes.

(part) (total)

How many cubes are left?

(part) (total)

There are ____ cubes left.

A. Start with 4 cubes.

(part) (total)

Take away 3 cubes.

(part) (total)

How many cubes are left?

(part) (total)

There is ____ cube left.

B. Start with 5 cubes.

(part) (total)

Take away 4 cubes.

(part) (total)

How many cubes are left?

(part) (total)

There is ____ cube left.

- A. Start with 4.
Take away 2.
How much is left?

$$4 - 2 = \underline{2}$$

$$2 + \underline{2} = 4$$

There is 2 left.

- B. Start with 5.
Take away 1.
How much is left?

There is ____ left.

Name: _____

Problem of the Day Lesson 54

Use the model to write the problem. Write an equation to show the part.

a. The total is _____ .

One part is _____ .

What is the other part?

$$\underline{\quad} - \underline{\quad} = \underline{\quad}$$

b. The total is _____ .

One part is _____ .

What is the other part?

$$\underline{\quad} - \underline{\quad} = \underline{\quad}$$

Name: _____

MATCHING - E

Fill in the missing part in each model.

Then draw a line from each model to the matching learning problem.

Start with 2.

- Take away 1.
There is 1 left.

Start with 4.

- Take away 2.
There are 2 left.

Start with 3.

- Take away 2.
There is 1 left.

Start with 5.

- Take away 3.
There are 2 left.

Start with 4.

- Take away 1.
There are 3 left.
