

Name: \_\_\_\_\_

A.

Each side of a triangle has a length of 2 in.

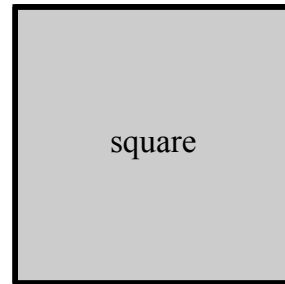

$$2 + 2 + 2$$

What is the perimeter?

6 in

B.

Each side of a square has a length of 3 in.

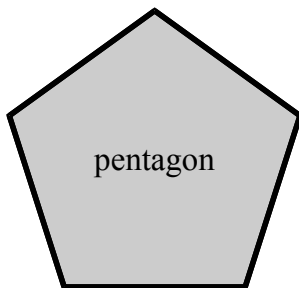

What is the perimeter?

\_\_\_\_\_ in

C.

Each side of a pentagon has a length of 4 in.

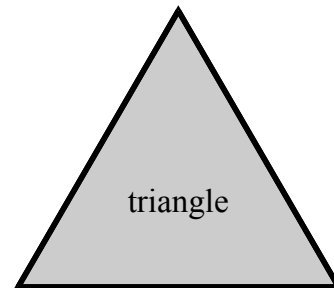

What is the perimeter?

\_\_\_\_\_ in

D.

Each side of a triangle has a length of 5 in.

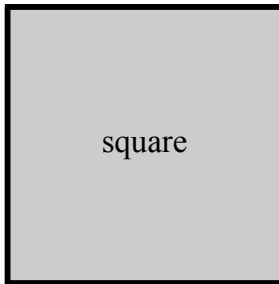

What is the perimeter?

\_\_\_\_\_ in

Name: \_\_\_\_\_

A.

Each side of a square has a length of 2 ft.

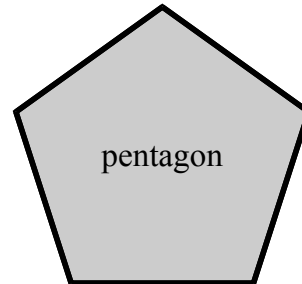

What is the perimeter?

\_\_\_\_\_ ft

B.

Each side of a pentagon has a length of 3 ft.

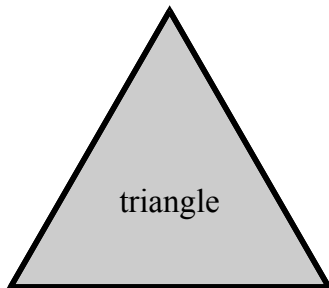

What is the perimeter?

\_\_\_\_\_ ft

C.

Each side of a triangle has a length of 4 ft.

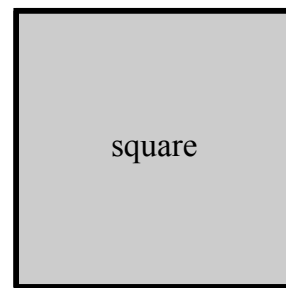

What is the perimeter?

\_\_\_\_\_ ft

D.

Each side of a square has a length of 5 ft.

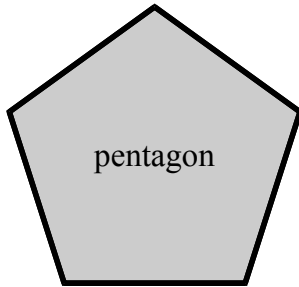

What is the perimeter?

\_\_\_\_\_ ft

Name: \_\_\_\_\_

A.

Each side of a pentagon has a length of 2 cm.

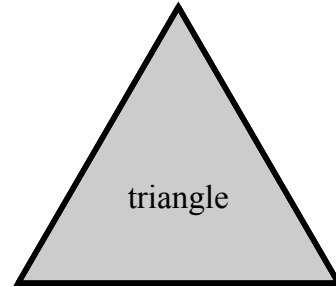

What is the perimeter?

\_\_\_\_\_ cm

B.

Each side of a triangle has a length of 3 cm.

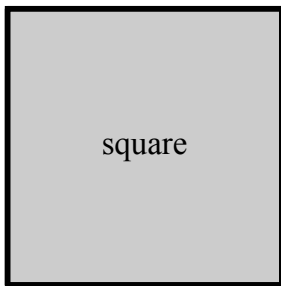

What is the perimeter?

\_\_\_\_\_ cm

C.

Each side of a square has a length of 4 cm.

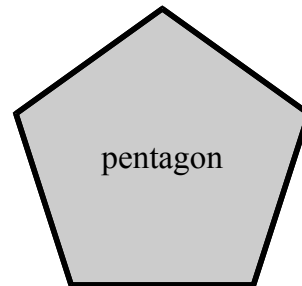

What is the perimeter?

\_\_\_\_\_ cm

D.

Each side of a pentagon has a length of 5 cm.

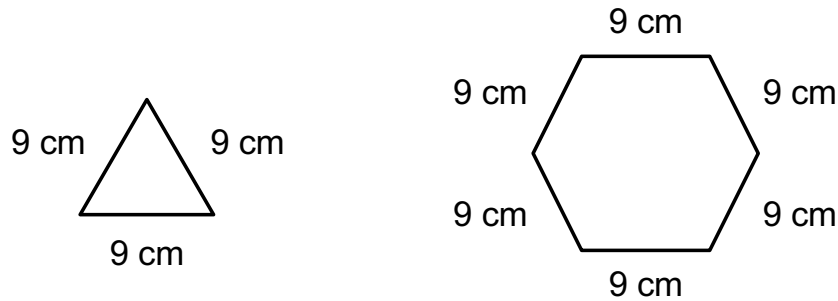

What is the perimeter?

\_\_\_\_\_ cm

Name: \_\_\_\_\_

Problem of the Day Lesson 35

Perry measures the sides of a triangle and the sides of a hexagon.  
The length of every side is 9 cm.

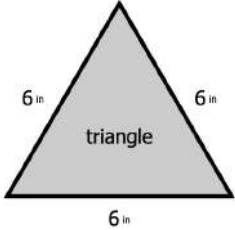

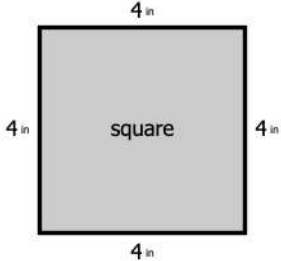

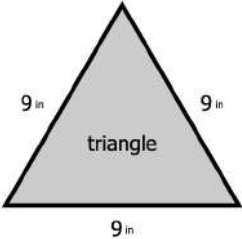

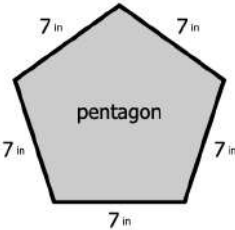

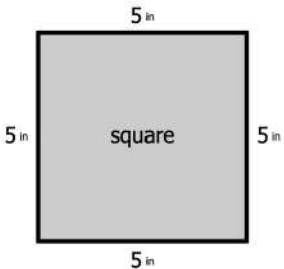

a. What is the triangle's perimeter, the total length of all the sides?

b. What is the hexagon's perimeter, the total length of all the sides?

Name: \_\_\_\_\_

# PERIMETER TABLE

Fill in the missing information to correctly complete each row of the table.

| Shape                                                                               | Number of sides: | Length of one side: | Perimeter: |
|-------------------------------------------------------------------------------------|------------------|---------------------|------------|
|    | 3                | 6 in                | 18 in      |
|   |                  |                     |            |
|  |                  |                     |            |
|  |                  |                     |            |
|  |                  |                     |            |
