

A.

SOLVE BY SHARING

$$18 \div 3 = \underline{6}$$

What is the total? $\underline{18}$

How many groups? $\underline{3}$

Multiplication: $\underline{3 \times ? = 18}$

How many in each group? $\underline{6}$

B.

SOLVE BY SHARING

$$4 \div 1 = \underline{\quad}$$

What is the total? $\underline{\quad}$

How many groups? $\underline{\quad}$

Multiplication: $\underline{\quad}$

How many in each group? $\underline{\quad}$

C.

SOLVE BY SHARING

$$20 \div 4 = \underline{\quad}$$

What is the total? $\underline{\quad}$

How many groups? $\underline{\quad}$

Multiplication: $\underline{\quad}$

How many in each group? $\underline{\quad}$

D.

SOLVE BY SHARING

$$35 \div 5 = \underline{\quad}$$

What is the total? $\underline{\quad}$

How many groups? $\underline{\quad}$

Multiplication: $\underline{\quad}$

How many in each group? $\underline{\quad}$

A.

SOLVE BY SHARING

$12 \div 3 = \underline{\quad}$

What is the total? _____

How many groups? _____

Multiplication: _____

How many in each group? _____

B.

SOLVE BY SHARING

$24 \div 4 = \underline{\quad}$

What is the total? _____

How many groups? _____

Multiplication: _____

How many in each group? _____

C.

SOLVE BY SHARING

$14 \div 2 = \underline{\quad}$

What is the total? _____

How many groups? _____

Multiplication: _____

How many in each group? _____

D.

SOLVE BY SHARING

$25 \div 5 = \underline{\quad}$

What is the total? _____

How many groups? _____

Multiplication: _____

How many in each group? _____

A.

SOLVE BY SHARING

$$24 \div 4 = \underline{\quad}$$

What is the total? _____

How many groups? _____

Multiplication: _____

How many in each group? _____

B.

SOLVE BY SHARING

$$15 \div 3 = \underline{\quad}$$

What is the total? _____

How many groups? _____

Multiplication: _____

How many in each group? _____

C.

SOLVE BY SHARING

$$16 \div 2 = \underline{\quad}$$

What is the total? _____

How many groups? _____

Multiplication: _____

How many in each group? _____

D.

SOLVE BY SHARING

$$35 \div 5 = \underline{\quad}$$

What is the total? _____

How many groups? _____

Multiplication: _____

How many in each group? _____

Name: _____

Tim plants 15 tulips and 12 daffodils in his flower garden. He plants them in an array with 3 rows. Tim plants the same number of tulips and the same number of daffodils in each row.

In the diagram below, show what Tim's garden might look like. Write a "T" to represent each tulip. Write a "D" to represent each daffodil.

- a. Multiply and divide to show how many *tulips* are in each row.

$$3 \times \underline{\quad} = \underline{\quad} \quad \underline{\quad} \div 3 = \underline{\quad}$$

- b. Multiply and divide to show how many *daffodils* are in each row.

$$3 \times \underline{\quad} = \underline{\quad} \quad \underline{\quad} \div 3 = \underline{\quad}$$

- c. Multiply and divide to show how many *flowers* are in each row.

$$3 \times \underline{\quad} = \underline{\quad} \quad \underline{\quad} \div 3 = \underline{\quad}$$

Name: _____

MATCHING - B

The 2 and 3 keys on Greg's keyboard were not working when he created this puzzle. Please write in the missing 2s and 3s and then draw lines to connect the matching division and multiplication equations.

$10 \div 5 = \underline{2}$

•

$5 \times 4 = \underline{\quad} 0$

$9 \div \underline{\quad} = \underline{\quad}$

•

$5 \times \underline{2} = 10$

$\underline{\quad} 0 \div 5 = 4$

•

$\underline{\quad} \times \underline{\quad} = 9$

$4 \div \underline{\quad} = \underline{\quad}$

•

$4 \times \underline{\quad} = 1 \underline{\quad}$

$1 \underline{\quad} \div 4 = \underline{\quad}$

•

$\underline{\quad} \times \underline{\quad} = 4$
