

Name: _____

A.

How many equal parts in 1? _____

How many parts are shaded? _____

What fraction is shaded? _____

B.

How many equal parts in 1? _____

How many parts are shaded? _____

What fraction is shaded? _____

C.

How many equal parts in 1? _____

How many parts are shaded? _____

What fraction is shaded? _____

D.

How many equal parts in 1? _____

How many parts are shaded? _____

What fraction is shaded? _____

Name: _____

A.

How many equal parts in 1? _____

How many parts are shaded? _____

What fraction is shaded? _____

B.

How many equal parts in 1? _____

How many parts are shaded? _____

What fraction is shaded? _____

C.

How many equal parts in 1? _____

How many parts are shaded? _____

What fraction is shaded? _____

D.

How many equal parts in 1? _____

How many parts are shaded? _____

What fraction is shaded? _____

Name: _____

A.

Show **4 EIGHTHS** on the number line.

How many equal parts in 1? _____

8

How many parts are shaded? _____

4

What fraction is shaded? _____

4/8

B.

Show **2 THIRDS** on the number line.

How many equal parts in 1? _____

How many parts are shaded? _____

What fraction is shaded? _____

C.

Show **3 SIXTHS** on the number line.

How many equal parts in 1? _____

How many parts are shaded? _____

What fraction is shaded? _____

D.

Show **5 EIGHTHS** on the number line.

How many equal parts in 1? _____

How many parts are shaded? _____

What fraction is shaded? _____

Name: _____

Problem of the Day Lesson 81

On the number lines below, show each proper fraction as a distance from 0.

- a. Divide 1 into 3 equal parts. Shade 2 parts. Write $\frac{2}{3}$ on the number line.

- b. Divide 1 into 6 equal parts. Shade 2 parts. Write $\frac{2}{6}$ on the number line.

- c. Divide 1 into 6 equal parts. Shade 5 parts. Write $\frac{5}{6}$ on the number line.

- d. Compare $\frac{2}{3}$, $\frac{2}{6}$, and $\frac{5}{6}$. Which is the greatest distance from zero?

Name: _____

RAISE THE BAR! - C

Draw lines from each bar to the matching fraction.
Then shade the correct fraction of each bar.

Note: There are different ways of showing fractions:

$\frac{1}{2}$

$\frac{1}{2}$

$\frac{1}{2}$

• $\frac{2}{3}$

• $\frac{2}{2}$

• $\frac{3}{8}$

• $\frac{3}{4}$

• $\frac{5}{6}$
