Problem of the Day Lesson 102

Luc, Marie, and Pierre live on the same road, as shown in the diagram. The distance between Luc's house and Pierre's house is $5 \frac{7}{10}$ kilometers. The distance between Luc's house and Marie's house is $2 \frac{4}{10}$ km.

- a. What is the distance between Marie's house and Pierre's house? Use partial differences to find the distance, in kilometers.

- b. Use partial sums to verify your answer is correct.
