

1.

$$5 - 2 = \square$$

2.

$$3 - 1 = \square$$

3.

$$4 - 3 = \square$$

4.

$$5 - 4 = \square$$

1.

$$5 - 3 = \square$$

2.

$$4 - 1 = \square$$

3.

$$3 - 2 = \square$$

4.

$$5 - 1 = \square$$

1.

$$2 - 1 = \square$$

2.

$$4 - 2 = \square$$

3.

$$4 - 3 = \square$$

4.

$$5 - 4 = \square$$

Subtract to find the missing part.

a. Cross off 2. How many are left?

$$\begin{array}{c} \underline{\quad} \\ \text{total} \end{array} - \begin{array}{c} \underline{\quad} \\ \text{part} \end{array} = \begin{array}{c} \underline{\quad} \\ \text{part} \end{array}$$

b. Cross off 4. How many are left?

$$\begin{array}{c} \underline{\quad} \\ \text{total} \end{array} - \begin{array}{c} \underline{\quad} \\ \text{part} \end{array} = \begin{array}{c} \underline{\quad} \\ \text{part} \end{array}$$

MATCHING - C

Draw lines from the number bond on the left to the matching equation on the right.
Then fill the blank with the correct number.

•

$$\bigcirc - \square = \hexagon$$

$$\bullet \quad 2 - 1 = \underline{\hspace{1cm}}$$

•

$$\bullet \quad 3 - 1 = \underline{2}$$

•

$$\bullet \quad 5 - 2 = \underline{\hspace{1cm}}$$

•

$$\bullet \quad 5 - 1 = \underline{\hspace{1cm}}$$

•

$$\bullet \quad 4 - 3 = \underline{\hspace{1cm}}$$
