

Imagine both parts on ten frames. What is the total?

If needed, draw to check your thinking.

a. $\frac{10}{\text{part}} + \frac{2}{\text{part}} = \frac{\quad}{\text{total}}$

b. $\frac{10}{\text{part}} + \frac{4}{\text{part}} = \frac{\quad}{\text{total}}$

c. $\frac{10}{\text{part}} + \frac{3}{\text{part}} = \frac{\quad}{\text{total}}$

d. $\frac{10}{\text{part}} + \frac{5}{\text{part}} = \frac{\quad}{\text{total}}$
