

Use a **dot strategy** to divide each rotated square into 2, 3, or 4 equal parts.

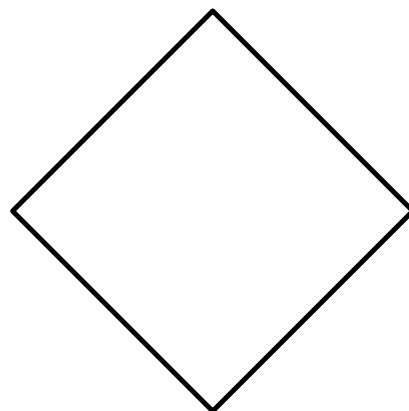

- a. Draw a dot in the middle.

Draw a vertical line through the dot to make 2 halves.

- b. Draw a dot and vertical line to make 2 halves.

Draw a horizontal line through the dot to make 4 fourths.

- c. Draw a diagonal line thru the dot to make 1 third.

Draw a dot and diagonal line in the middle of the larger part to make 2 more thirds.
