

Subtract using the Make 10 strategy. Cross off ones to make 10, then cross off the rest. Show your thinking with equations.

a.

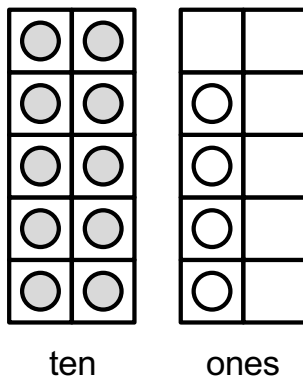

What is $13 - 4$?

$$13 - \underline{3} = 10$$

$$10 - \underline{\quad} = \underline{\quad}$$

b.

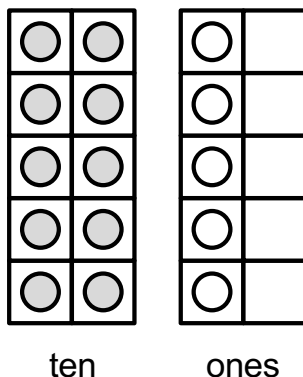

What is $14 - 6$?

$$14 - \underline{\quad} = 10$$

$$10 - \underline{\quad} = \underline{\quad}$$

c.

What is $15 - 8$?

$$15 - \underline{\quad} = 10$$

$$10 - \underline{\quad} = \underline{\quad}$$
