

Use a place-value strategy by crossing off and redrawing ones.
Group the ones, add the tens, and show your thinking with equations.

a.

$$71 + 4 = \underline{\quad}$$

$$\underline{4} + \underline{1} = \underline{\quad}$$

$$\underline{\quad} + \underline{\quad} = \underline{\quad}$$

b.

$$82 + 5 = \underline{\quad}$$

$$\underline{\quad} + \underline{\quad} = \underline{\quad}$$

$$\underline{\quad} + \underline{\quad} = \underline{\quad}$$

c.

$$93 + 6 = \underline{\quad}$$

$$\underline{\quad} + \underline{\quad} = \underline{\quad}$$

$$\underline{\quad} + \underline{\quad} = \underline{\quad}$$
