Boynton School has 567 students. DeWitt School has 432 students.
How many more students go to Boynton than DeWitt?

a. Draw a bar model and compare the number of students in each school.

b. Use number bonds to break the number of students into expanded form.

c. Subtract to find how many more students go to Boynton than DeWitt.

MAZE - D

Find a path from the top to the bottom of the maze.
Circle the expression if the **difference is 234.**
