

Nancy and Drew love reading mystery books. Last week, Drew read 162 fewer pages than Nancy. Drew read 375 pages.

- a. Label the model.
Use a “?” when a value is unknown.

- b. How many pages did Nancy read last month?
Use number bonds, expanded form, and equations to show your thinking.

$$\begin{array}{c} \boxed{} \\ \diagup \quad | \quad \diagdown \\ \text{---} \quad \text{---} \quad \text{---} \end{array} + \begin{array}{c} \boxed{} \\ \diagup \quad | \quad \diagdown \\ \text{---} \quad \text{---} \quad \text{---} \end{array} = ?$$

Hundreds: $\text{---} + \text{---} = \text{---}$

Tens: $\text{---} + \text{---} = \text{---}$

Ones: $\text{---} + \text{---} = \text{---}$

Total: $\text{---} + \text{---} + \text{---} = \text{---}$

Nancy read --- pages last month.
