

1. Each side of a regular pentagon is 6 in.
What is the pentagon's perimeter?

$$5 \times 6 = \underline{\mathbf{30}}$$

The pentagon's perimeter is **30** in.

-
2. Each side of a rhombus is 9 in.
What is the rhombus's perimeter?

The rhombus's perimeter is ____ in.

1. Each side of a rhombus is 7 ft.
What is the rhombus's perimeter?

The rhombus's perimeter is ____ ft.

-
2. Each side of an equilateral triangle is 8 ft.
What is the triangle's perimeter?

The triangle's perimeter is ____ ft.

1. Each side of an equilateral triangle is 6 cm. What is the triangle's perimeter?

The triangle's perimeter is ____ cm.

-
2. Each side of a regular pentagon is 8 cm. What is the pentagon's perimeter?

The pentagon's perimeter is ____ cm.

a. What is the square's perimeter, the total length of all the sides?

b. What is the pentagon's perimeter, the total length of all the sides?

c. If all the sides of an octagon are also 8 cm, what is the perimeter?

WHO AM I?

Write the correct answer on the line below each clue.

Be sure to read carefully!

One side of a square is
one inch more than
7 inches.

I am the perimeter
of the square.

Who am I?

_____ in

One side of an equilateral
triangle is
three cm more than
6 cm.

I am the perimeter
of the triangle.

Who am I?

_____ cm

One side of a regular
pentagon is
two cm less than
9 cm.

I am the perimeter
of the pentagon.

Who am I?

_____ cm

One side of a square is
two inches less than
8 inches.

I am the perimeter
of the square.

Who am I?

_____ in
