

There are 9, evenly-spaced fence posts. Seth builds one new section of fence each day. After 5 days, the fence looks like the picture below.

What fraction of the fence has Seth completed so far?

- | | |
|------------------|------------------|
| a. $\frac{3}{9}$ | c. $\frac{5}{9}$ |
| b. $\frac{5}{8}$ | d. $\frac{6}{9}$ |

Enrichment.* If there were 11 posts instead of 9 posts, what fraction of the whole fence would Seth have completed so far?
