

1.

How many equal parts in 1? _____

How many parts are shaded? _____

What fraction is shaded? _____

2.

How many equal parts in 1? _____

How many parts are shaded? _____

What fraction is shaded? _____

3.

How many equal parts in 1? _____

How many parts are shaded? _____

What fraction is shaded? _____

4.

How many equal parts in 1? _____

How many parts are shaded? _____

What fraction is shaded? _____

1.

How many equal parts in 1? _____

How many parts are shaded? _____

What fraction is shaded? _____

2.

How many equal parts in 1? _____

How many parts are shaded? _____

What fraction is shaded? _____

3.

How many equal parts in 1? _____

How many parts are shaded? _____

What fraction is shaded? _____

4.

How many equal parts in 1? _____

How many parts are shaded? _____

What fraction is shaded? _____

1.

Show **1 HALF** on the number line.

How many equal parts in 1? _____

How many parts are shaded? _____

What fraction is shaded? _____

2.

Show **1 SIXTH** on the number line.

How many equal parts in 1? _____

How many parts are shaded? _____

What fraction is shaded? _____

3.

Show **1 FOURTH** on the number line.

How many equal parts in 1? _____

How many parts are shaded? _____

What fraction is shaded? _____

4.

Show **1 EIGHTH** on the number line.

How many equal parts in 1? _____

How many parts are shaded? _____

What fraction is shaded? _____

On the number lines below, show each unit fraction as a distance from 0.

- a. Divide 1 into 2 equal parts. Shade 1 part. Write $\frac{1}{2}$ on the number line.

- b. Divide 1 into 4 equal parts. Shade 1 part. Write $\frac{1}{4}$ on the number line.

- c. Divide 1 into 8 equal parts. Shade 1 part. Write $\frac{1}{8}$ on the number line.

- d. Compare $\frac{1}{2}$, $\frac{1}{4}$, and $\frac{1}{8}$. Which is the greatest distance from zero?

RAISE THE BAR! - B

Draw lines from each bar to the matching fraction.
Then shade the correct fraction of each bar.

Note: There are different ways of showing fractions:

$$\frac{1}{2} \quad \frac{1}{2} \quad \frac{1}{2}$$

• $\frac{1}{3}$

• $\frac{1}{8}$

• $\frac{1}{2}$

• $\frac{1}{4}$

• $\frac{1}{6}$
